PYROTECHNIC MASTER

Throughout the ages, man, fascinated by fire, has attempted to bring it under his control. In the 9th century, the Chinese discovered black powder, a mixture of charcoal, sulphur and saltpeter. First used as a weapon of warfare, it was not until the 15th century that gunpowder, with its explosive properties, found a peaceful application as what would later be called pyrotechnics.

B.E.M. is a highly contemporary company. Yet our modern technology and expertise have grown from the knowledge accumulated over the centuries during man's quest to control and domesticate fire.

With over a quarter century of experience in the conception, production and performance of fireworks displays, B.E.M., as a master fireworks handler, produces shows using the widest possible range of colors and special effects available.

B.E.M. works with the finest manufacturers in the world to develop unique items and new effects.

The reputation in which B.E.M. takes pride has not developed by chance. It has been earned through the personalized care with which every display is designed, made to measure to correspond to the specific theme of each festivity. We take every possible advantage of the site placed at our disposal in order to ensure a fireworks display which will surpass your greatest expectations, always with the best possible quality / price ratio in mind.

The quality of a fireworks display depends upon the choice and arrangement of the pyrotechnic devices. This is why B.E.M. is engaged in an ongoing quest for excellence, both in terms of the concept scenario as well as in the quality of the pyrotechnical products. Consequently, each B.E.M. show is entirely distinct and wholly original.

The following pages present a selection of photographs illustrating a variety of our pyrotechnic arrangements.

At B.E.M., every choreography is designed to ensure balance and harmony between rhythmic and visual effects. The creative approach for which B.E.M. is well-known is characterized by spectacular presentations of color and changes of theatrical intensity.

B.E.M., through its reputation, seeks to ensure that your fireworks display is the most eagerly awaited event of your festival.

One of B.E.M.'s objectives is to create scenes and sequences of such splendor and intensity that they imprint themselves upon the memories of the spectators, leaving a vivid impression of the display they have just witnessed.

Winter is also a time for celebration. Carnivals and winter festivals bring together people of all ages.

Weather conditions during this season require specially adapted techniques. The reflection of colors on the snow is one of the elements which can create exceptional impact.

Presentations can also be designed to accompany personalized musical themes, depending on your taste and requirements. Our music repertory allows us to offer a wide selection of musical styles. On request, we can also synchronize and produce professional mixes.
